Plugged in and turned on of the Air+ 300 S / 430 S

- 1 Before turning it on, check that you have all the relevant items: cable and Air+ 300 S / 430 S.
- 2 Locate a power supply for connection to the PAir+ 300 S / 430 S and plug the equipment to the power supply using the power cord.
- 3 To switch the equipment on, double click on the power button (ON / OFF) and the screen and its perimeter light will illuminate.
- 4 After having checked its proper operation, it is recommended to set the purifier at its maximum speed during the first 10 minutes to execute a deep cleaning of the room.
- 5 Then, it is recommended to leave it at medium speed, below 5, to maintain optimal recirculation and comfort speed.
- 6 If you are going to set the automatic shutdown of the equipment, use the timer button (see point 2), selecting the desired operating

The screen turns off automatically after 1 minute of inactivity. But, if you want to turn off the lights on the screen in that very moment, click once on the ON / OFF button.

The proximity sensor detects the movement of your hand as it passes over and turns the screen back on.

Switching off and disconnection of the Air+ 300 S / 430 S

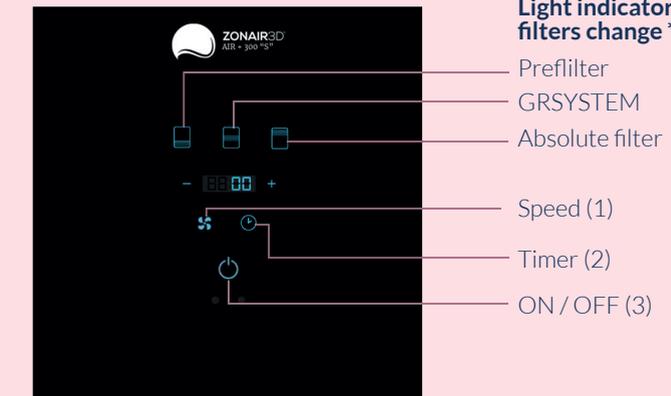

To turn off the equipment, press and hold on the ON / OFF button for 3 seconds.

If you are going to stop using the purifier for a long period of time, it is recommended to disconnect from the power supply.
